

In/Out

Line Calls and Stats for Everyone

CAGE INSTALLATION MANUAL

- 1** Choose a net post to install the cage on

TIPS

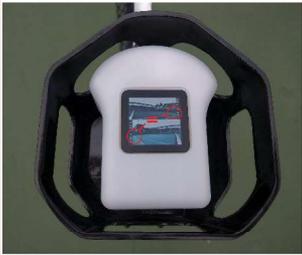

Only square net posts are going to work with the cage

Try to put the cage on your net post and see how it fits

- 2** Screw the device in the cage, turn it on, and put the cage on the net post

- 3** Go to line call and adjust the rotation of the device to cover the whole court

TIPS

Press outside the overlay to see the court

Make sure spaces are equal on both sides

Take your time to adjust the rotation

- 4** Unscrew the two metal circle straps

TIPS

Those metal circle straps are very standard

You can find and replace them at your usual local hardware store such as Home Depot in the USA

- 5** Put the first metal strap around the net post matching the cage bottom recess

TIPS

You can use the white band to help you to hold the cage while you are screwing the strap

It's best to be two persons during the installation

- 6** Strap the second metal circle attachment the same way. Your In/Out cage is ready!
